Kyle Roleson

734-431-3206 – kyleroleson@gmail.com – GitHub - LinkedIn

Skills

C, C++, C#, Python, Rust, Java, TypeScript, ARM Assembly, MATLAB, Git, Docker, Test Driven Development, Google Cloud Platform, MySQL, Windows, Linux, Unity, Unreal Engine, FFMPEG, Flask, Jira, OpenShift, Spring, React, Angular

Experience

Auto-Owner's Insurance — **Associate Software Developer II**

Jun 2025 - Current — Marketing Systems

- Full-stack development of internal Spring/DB2 + Angular/React applications, designing, building, testing, and shipping features that improve performance, reliability, and user experience.
- Led modernization and full rewrites of legacy systems, eliminating technical debt, replacing outdated frameworks, stabilizing integrations, and unblocking rapid iteration and feature delivery for internal teams of dozens and external users of thousands.

Robert Bosch GmbH — **Software Engineering Intern**

May 2024 - Aug 2024 — Video Driver Assistance

- Spearheaded design and development of an innovative autonomous driving algorithm utilizing control mechanisms (PID, feed-forward, and model-predictive control) to enable seamless automatic trailer reversal while mitigating common challenges such as trailer jackknifing.
- Built custom simulations in MATLAB and Python and Unreal Engine 5 to evaluate and fine-tune algorithms for key milestones in functionality and stability.

Robert Bosch GmbH — **Software Engineering Intern**

May 2022 - Aug 2023 — Video Driver Assistance

- Developed and executed unit tests in C++ for advanced driver assistance system (ADAS) functionalities, ensuring software reliability and system safety.
- Designed and prototyped a wireless camera system using a Linux-based embedded development kit and FFMPEG, enabling real-time video streaming.

Projects

- Daemon: An online team competitive game developed in Unreal Engine and published on Steam
- Senior Design Project: An accessibility-focused real-time teleconferencing job coaching system.
- Project Mercury: An original first-person shooter video game developed in Unreal Engine 5.
- Trello Clone: A fully working live multi-user Kanban web application made with Flask and MySQL.

Education

Georgia Institute of Technology — **Master of Science in Computer Science**

Current

Michigan State University — **Bachelor of Science in Computer Science Engineering**

- Achieved a GPA of 3.96
- Minored in Game Design and Development, with a focus on Systems and Gameplay Programming
- National Merit Scholarship Recipient (All semesters)
- Dean's List (All semesters)
